

Dear Parents Guardians,

Our Lady's College aims to improve the facilities for students. With the recent emphasis on wellbeing and following a long tradition of pastoral care in the school teachers have identified the benefits of promoting participation in sport to help build the character and wellbeing of students.

We plan to construct an all -weather Astro facility. The development of an Astro facility is in its infancy stage. The Astro facility will support the curriculum and the extra -curricular activities of teachers and students in the school. The following sports will be played on the all- weather facility

- Basketball
- Soccer
- Camogie
- Gaelic Football
- Athletics
- Hockey

Fundraising

We plan to hold an Oscar (Oskars) event next January 24th. Please see the attached flyer with further details.

We are looking for parents to get involved and to encourage companies friends or to participate in the process. It is an excellent experience full of fun and opens the opportunity for you to try something different over the winter months.

There will be a meeting in the school in October. Details of the information night facilitated by Kevin Rowe events will be communicated to you at a later date.

The process involves an individual signing up themselves or with a group of friends. Through sponsorship they raise an amount of money and for this they participate in the making of a professional standard movie supported with acting classes and filming of a chosen movie. In January there will be an evening at the movies in the City North Hotel with all the glitz and glamour of an Oscar evening.

For our development to proceed we need as many parents as possible to get involved, names can be given to Mr Conway in the school by Friday October 4th.
